## Project Details

Name: Speedway RFID Swimming Prototype  
Researcher: Richard McCarthy  
Date: 12th June 2020

---

## Work Carried Out

Resumed work on the project after several weeks off.

Mainly getting back up to speed on the details of everything which have fully completed doing now.

Added some new code to the standalone Java application around its structure and started with integrating this with the Octane SDK code.

The standalone Java application can now successfully connect to the Impinj Reader.

---

## Known Blockers

Currently none

---

## Next Steps

Complete the standalone Java application for filtering data from the Reader and start working on the cloud application then.
